Double Entire Desk

The Automatic Triumph Desk

Is your school equipped with Automatic Triumph Desks? If so, what follows was not written for you, but for those who have yet to experience the satisfaction of using a perfect desk. Wherever the Automatic Triumph Desks have been used, no argument except that furnished by the desks themselves is needed to convince anyone of their superiority. You who are not familiar with the Automatic Triumph Desks have no doubt used them without knowing it. This desk has been made for 30 years and sold in every section of the country. Perhaps your own early education was received while seated in our Automatic Triumph Desk.

Thirty years is a long time for any manufactured article to hold supremacy. No other school desk can show a clean record for half this length of time. Many desks have come and gone during 30 years. Of those that remain there is scarcely one that has not undergone many changes in construction since the time it was first marketed. This is not true of the Automatic Triumph.

The hinge of the Automatic Triumph is the same today as it was 30 years ago. At that time it was so nearly perfect that improvement has been found impossible.

The supentine method of fastening woods to castings is another distinctive and unchanged feature of this desk.

The shape of the back and seat has not been changed. They have always been made to conform to the body curves.

The Automatic Triumph costs no more than any other good desk, but is worth more because of its unapproachable record; because it is practically indestructible and outlasts all other styles; because there are more of them in use than any other three styles of desks combined.

Any user of Automatic Triumph Desks knows that we have not over-stated its merits. If you are not using them send for our booklet that describes the desk in detail and gives full information about sizes and shows views of the desks in use in schools in many states.

The Chandler Adjustable Desk and Chair

Do you know why the Chandler Adjustable Desk is superior to the ordinary combination school desk? Have you ever given the matter of adjustable seating any consideration? If you have not, you should make a thorough investigation without delay.

Most schoolrooms are furnished with two or possibly three sizes of stationary desks. Think of the difference in size of the pupils in almost any room. Would two or three sizes of shoes provide a perfect fit for them all? No! Neither will two or three sizes of desks. Ill-fitting desks are the cause of many of the troubles that are charged to over-study, poor ventilation, close confinement, etc. You who are in control of school matters should give the seating problem your serious consideration. If you advocate the use of adjustable furniture, no blame for the eye, spine and lung troubles that the pupils develop can be charged to you. Adjustable seating reduces the number of these cases fully 50%.

The separate, adjustable chair helps the teacher maintain order and gives each pupil a comfortable seat. The nervous child can not disturb his neighbor in front or behind him by his restlessness, for his desk and chair are entirely free from theirs.

Send for our booklet on the Chandler Adjustable Desk and Chair.

Teachers' Desks

We have the largest and best line of teachers' desk ever offered. They have proven popular with school boards on account of quality and low price, and with principals and teachers because of great convenience and capacity.

The desks are built by expert cabinet makers from the best selected kiln-dried oak, finish golden. Construction is solid and durable. Book guards are high. All drawers are large and have separate locks; run on continuous slides.

Illustrated and described fully in our Teachers' Desk and Chair catalogue.

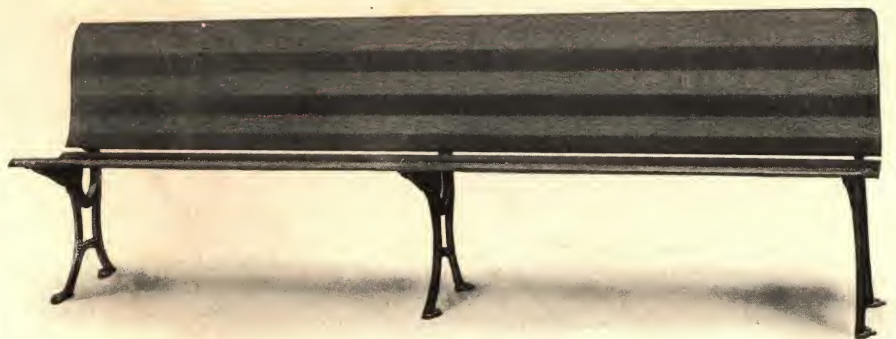

Teachers' Chairs

Our fine line of teachers' chairs is fully illustrated and described in our Teachers' Desk and Chair catalogue.

Book Cases

We manufacture a number of styles of book cases for schoolroom use. These cases are well made and nicely finished. They are described at length in our school supply catalogue.

Recitation Seats

Our folding recitation seats are made of the same materials and with the same care as our desks. The woods are of alternating maple and cherry slats. Castings are heavy, attractive in design and finished in black japan. They are made in six sizes to correspond to the six sizes of stationary desks. They may be supplied with stationary or folding tablet arms if desired.

We carry 6 and 8 feet lengths in stock and can ship on short notice. Longer lengths take slightly longer time as they must be made specially.

School Supplies

Globes, Blackboards, Tellurians, Erasers, Maps, Crayons, Charts, Blinds, Wire Window Guards, School Papers, Pens, Pencils, Pencil Sharpeners, Ink, Ink-Wells and Fillers, Bells, etc.

Before you buy, send for our free catalogue and ask for samples of the things you want.
